5.1.1 } Leap year checker

Algorithm :--

1. **Start**
2. **Read** the input year.
3. **Check** if the year is divisible by 4 **and** not divisible by 100 **and** the year is not divisible by 400.
4. **If** the condition is true, Display **"Leap year"**.
5. **Else** Display **"Not a leap year"**.
6. **Stop**

Code :--

```
year = int(input())

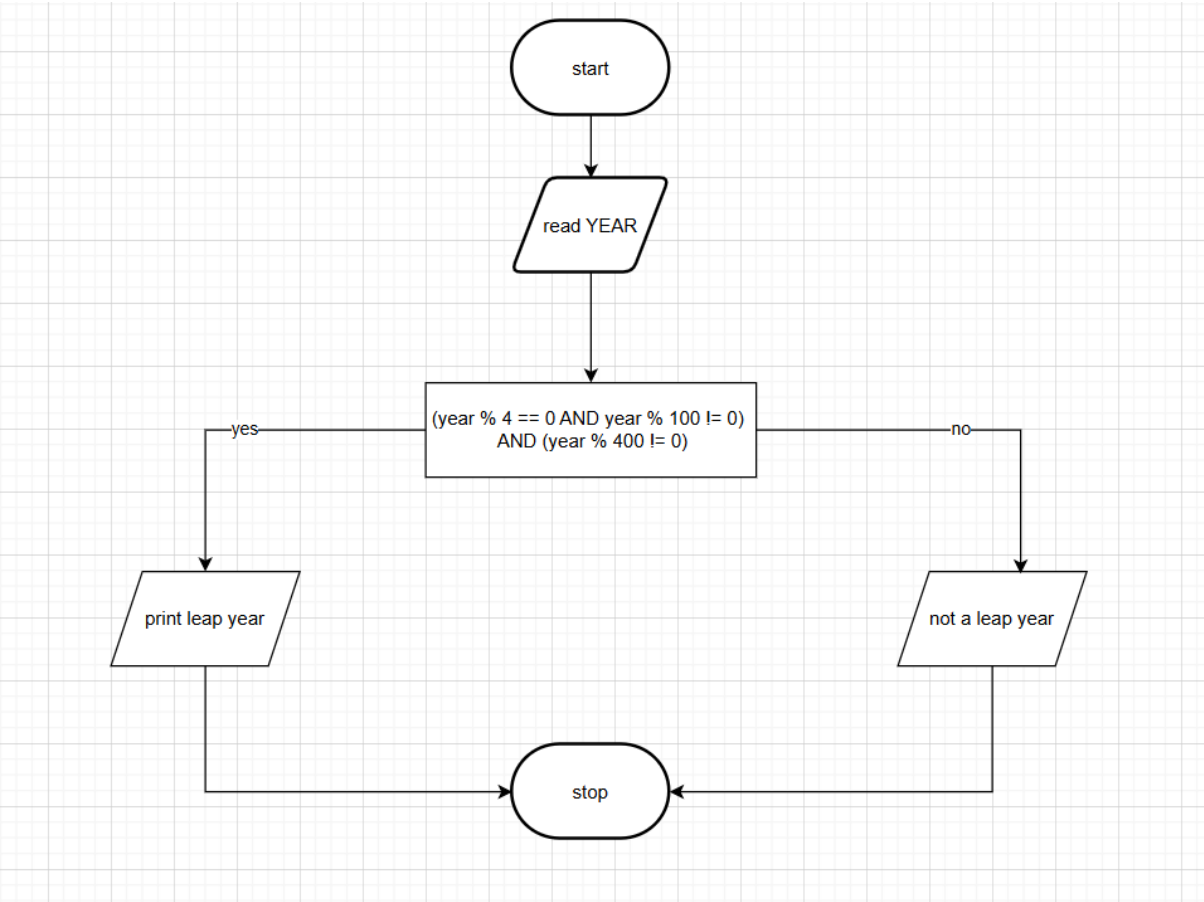
if(year %4 == 0 and year % 100 != 0) and (year % 400 != 0) :

        print("Leap year")

else :

        print("Not a leap year")
```

Flow chart :--



start
read YEAR
(year % 4 == 0 AND year % 100 != 0)
AND (year % 400 != 0)
yes
no
print leap year
not a leap year
stop

5.1.1. Leap Year Checker
04:33
Write a Python program that prompts the user to enter a year. The program should determine if the year is a leap year or not and print the appropriate message.
Input Format:
• A single line contains an integer representing the year.
Output Format:
• Print "Leap year" if it is a leap year. Otherwise, print "Not a leap year".
Sample Test Cases
leapYear.py
SUBMIT
year = int(input())
if(year %4 == 0 and year % 100 != 0) and (year % 400 != 0) :
print("Leap year")
else :
print("Not a leap year")
Average time
