5.1.2 Student Grade Based on Aggregate

ALGORITHM

1. Start
2. Input marks of four subjects (m1, m2, m3, m4)
3. Calculate total

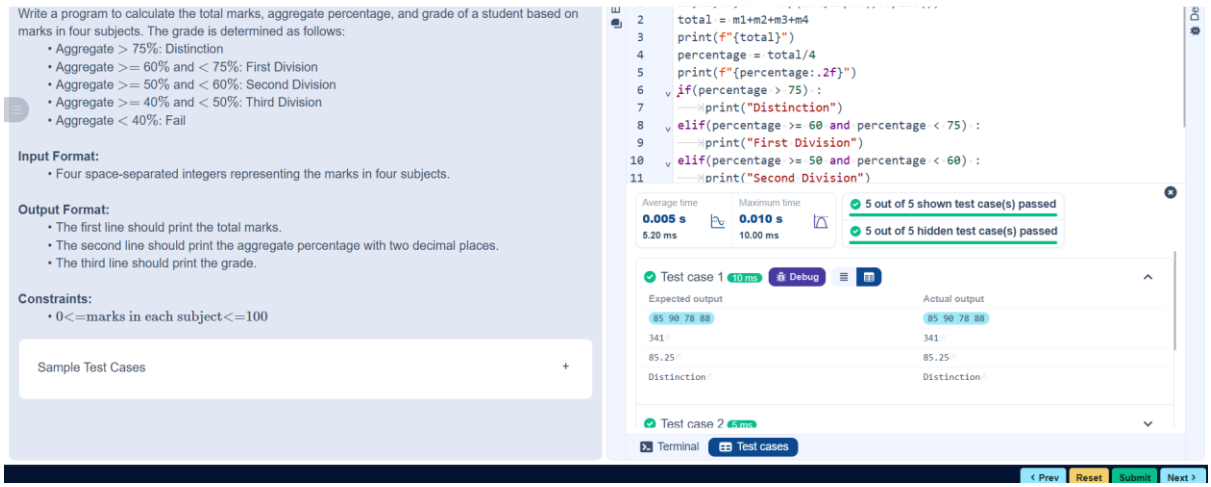
$$total = m1 + m2 + m3 + m4$$

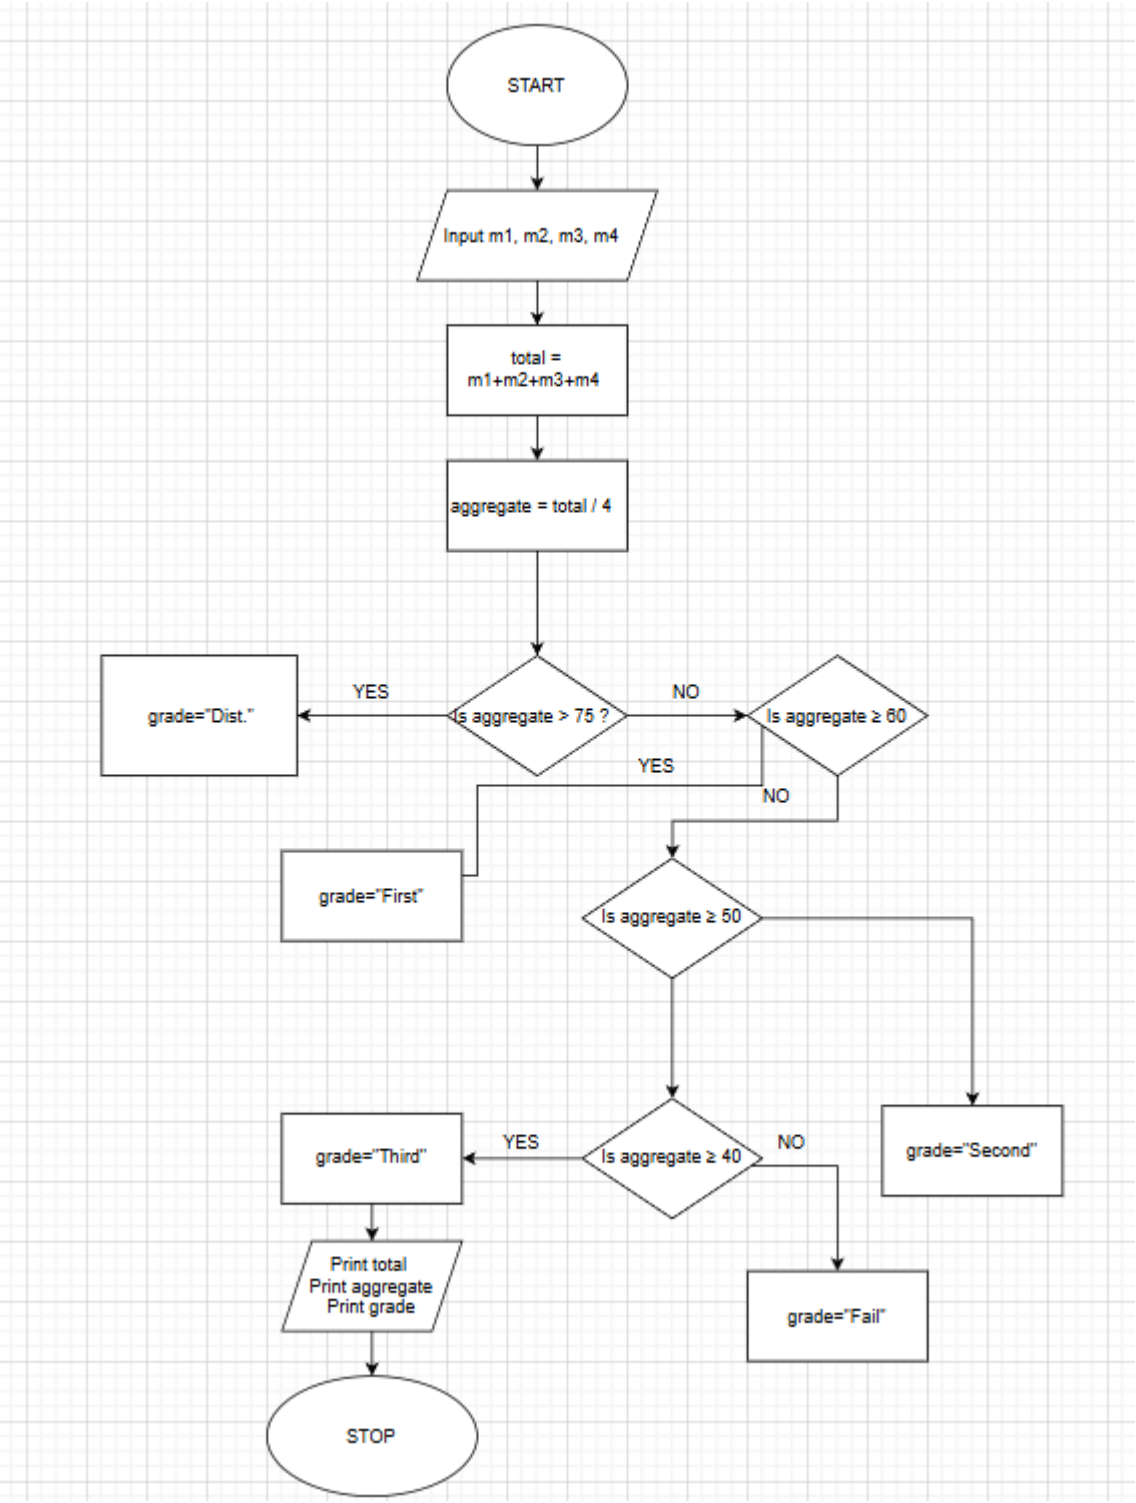
4. Calculate aggregate percentage

$$aggregate = total/4$$

5. If aggregate > 75
   → grade = "Distinction"
6. Else if aggregate ≥ 60
   → grade = "First Division"
7. Else if aggregate ≥ 50
   → grade = "Second Division"
8. Else if aggregate ≥ 40
   → grade = "Third Division"
9. Else
   → grade = "Fail"
10. Print total
11. Print aggregate (two decimal places)
12. Print grade
13. Stop

CODETANTRA:-





START
Input m1, m2, m3, m4
total =
m1+m2+m3+m4
aggregate = total / 4
Is aggregate > 75 ?
YES
grade="Dist."
NO
Is aggregate ≥ 60
YES
grade="First"
NO
Is aggregate ≥ 50
Is aggregate ≥ 40
YES
grade="Third"
NO
grade="Second"
grade="Fail"
Print total
Print aggregate
Print grade
STOP
